# Designing Business Continuity Solutions

## Part of the DESIGN stage of the BCM Lifecycle

### Course Description

This one day learning experience will cover how to design appropriate business continuity (BC) solutions, determine recovery objectives and prepare for the Implementation stage of the Business Continuity Management (BCM) Lifecycle, as well as designing an efficient incident response structure.

This course provides the business continuity and resilience professional with the opportunity to gain a deeper understanding of the Design stage of the BCM Lifecycle. The Design stage builds on the outcomes from the Analysis stage. This course is based on the BCI Good Practice Guidelines 2018.

### Course Objectives

- Understand and explore the options for designing business continuity solutions
- Set recovery point objectives and recovery time objectives
- Prepare for the Implementation stage of the BCM Lifecycle
- Design an effective incident response structure

### Who Should Attend?

- Business continuity and resilience professionals who require in-depth knowledge and an understanding of how to design business continuity solutions appropriate for their organisation.
- It is recommended that students have a minimum of a CBCI or equivalent credential with experience working in a continuity and resilience related role.

### Course Delivery

This BCI training course is delivered as a one day, live online training course by an approved BCI tutor. Scheduled breaks will be provided within each session. During the course, delegates will be able to use their microphones to take part in discussions and ask the tutor any questions, there is also the option to use a webcam too. Interactivity features used during the training may include the use of breakout sessions for group work, polls and quizzes. The course is delivered via GoToTraining.

### Certificate of Attendance

A certificate of attendance will be issued to delegates following the completion of the course. Completing this course will contribute towards your Continuing Professional Development (CPD).

# Designing Business Continuity Solutions

## Course Modules

### Module 1 - Design Options

- Strategies and Tactics
- Recovery Requirements
- Insurance and Finance
- IT DR
- Maximum Survivable Incident

### Module 2 - Recovery Point Objectives and Recovery Time Objectives

- Setting RPOs
- Setting RTOs
- Issues to consider

### Module 3 - Preparing for Implementation

- Consolidation
- Checking Design solutions
- Recovery Capability
- Establishing Projects

### Module 4 – Incident Response Structure

- Incident Response Structure
- Response phases
- Response teams
- Activation

## Recommended Reading

This course is based on the BCI Good Practice Guidelines 2018 and it is advisable for delegates to be familiar with the Good Practice Guidelines 2018 prior to attending the course. The GPG 2018 can be purchased via our shop.

# Designing Business Continuity Solutions

## Course Cost

The cost of this one day training course is £525 + VAT.

Course slides are provided.

## FAQs

- **What are the timings of my training course?**

The timings for the session is 9.30-12.30 and 13.30-16.30 BST. Scheduled breaks will also be provided within each session. Timings are indicative and exact timings may vary due to student experience and their interest in certain topics. The course may finish earlier if all topics have been covered

- **What do I need for the course?**

Everything you will require will be provided on the day. If you have a copy of the Good Practice Guidelines 2018, please bring it along to the course with you.

If you have further questions or would like an official quotation please contact a member of the BC Training Team:
