## Course Description

The BIA is the main technique used for analysing an organisation and forms the analysis stage of the business continuity management lifecycle. It will help you review and assess an organisation to identify its objectives, how it functions, and the constraints of its operating environment.

This course comes complete with course slides and workbook that contains exercises to be completed throughout the course. The course is based on the Good Practice Guidelines Edition 7.0 and reflects current International Standards in business continuity.

## Course Modules

Module 1 – Concepts of BIA

Module 2 – The Four Types of BIA

Module 3 – BIA methods

Module 4 – How the BIA information is used in the Design phase of the BCM Lifecycle

## Course Benefits

By the end of this course, delegates will be able to:

- Understand and apply the different methods available to conduct a BIA
- Extract all the information you need from an organisation to enable you to design the most appropriate business continuity solutions

Completing this course will contribute towards your BCI Continuing Professional Development (CPD).

## Who Should Attend?

- Business continuity and resilience practitioners who require an in-depth knowledge and an understanding of how to carry out a BIA.
- It is recommended that students have a minimum of a CBCI or equivalent credential with experience of working in a continuity and resilience related role.

## Course Delivery

## Testimonial

“This was one of the best courses I have taken in some time. It was an excellent class that was most ably facilitated by Gillian [Logie]. She was patient, helpful and explained concepts clearly.”
